Request for additional records – 2

Dismissed – 17

National Practitioner Data Bank – 3 (No further action)

License Application Issues – 2 approved; 1 referred to legal counsel

Well-Being Report

Report on 25 cases – require appearance before next LEC of person in violation of WBC

Advanced Education in General Dentistry (AEGD)

Real-World Education.

In this one-year (second year optional) ADA-CODA accredited community health center-based program, AEGD postdoctoral residents receive comprehensive training in general dentistry as well as superior preparation for advanced specialties. The program – the largest in the world of its kind – builds experience in small, medium and large practice settings, working with general and specialist dentists, dental hygienists and dental assistants and physicians. Residents get hands-on clinical experience in an encyclopedic range of disciplines and treat upwards of 1,500 to 2,000 patients during the year. Residents encounter cases ranging from the straightforward to the intricate – learning to work with children, elderly, phobic patients along with people with developmental disabilities and other medically compromising conditions. LMC Dental AEGD training will empower successful graduates with the skills and confidence to handle virtually any clinical challenge.

Real-World Advantage.

This unique and exceptional program advances a resident's skills in general dentistry in a way that traditional school-based or clinic-only-based programs cannot. Guided and mentored by our world-class faculty, residents perform thousands of procedures on patients in state-of-the-art clinical facilities that serve underserved and culturally diverse communities. Here, as part of a service learning mission, residents are given the means not only to develop residents professional skills and learn the business side of running a practice, but to also discover how to best utilize newly acquired advanced skills..

The vast majority of LMC Dental's AEGD residents go on to become successful oral healthcare professionals in community health centers, private practices, dental public health programs, schools of dentistry, healthcare organizations and clinical operations management. Many remain with LMC Dental to play a significant role in one of its programs often because they have found that LMC Dental's approach gives them an opportunity to make a lasting difference in the lives of so many.

More Places, Complex Cases and Diverse Populations

AEGD resident training takes place in one or more of over 300 affiliated clinical training sites (each recognized by CODA as an LMC Dental training center) throughout the continental United States, Alaska, Hawaii, and the Caribbean. These facilities are located in areas that serve the poor, chronically ill and those living in urban, rural and remote communities where access to quality oral health care services is limited or non-existent.

Be part of the service learning mission:
Learn while providing quality healthcare services
to underserved communities and populations.

Over 35% of our graduates remain in
public health dentistry and many more
give back through volunteer missions

AEGD Curriculum and Program Strengths

The AEGD program provides residents with in-depth, hands-on, personalized clinical training that encompasses 75% of a resident's experience. Residents will provide comprehensive oral health care to patients from start to completion and have the opportunity to perform a variety of standard and advanced clinical procedures in all areas of dentistry. For continuity of patient care and resident experience, residents will study, practice and train with world-class mentors who are located in each of our geographically diverse training sites. Residents treat general dentistry patients, medically complex cases and age-specific conditions.

Didactic instruction includes formal lectures via video-conferencing, asynchronous web-based forums, lectures and small, group interactive sessions. Courses, electives and requirements include core public health subjects as well as:

- Patient Risk Assessment
- Diagnosis
- Treatment Planning
- Preventive Dentistry
- Restorative Dentistry
- Oral Surgery
- Practice Development Management Skills
- Endodontics
- Periodontics
- Fixed & Removable Prosthodontics
- Implant Dentistry
- Pain & Anxiety Control/ Conscious Sedation
- Medical Emergency Management

3:1 faculty to
student ratio

Brian K. Bishop
Executive Director

September 12, 2011

Dr. Henry D. Hood
Director of Clinics and Research
Underwood and Lee Clinic
1800 Bluegrass Avenue
Suite A
Louisville, Kentucky 40215

Re: Board Decision

Dear Dr. Hood:

The Kentucky Board of Dentistry, having met in regular session on Saturday September 10th, 2011, considered your request and has made the following decision:

1. The Board, under the authority of KRS 313.070 and 201 KAR 8:532 has deemed you an approved educational institution and extends to you and your clinic all the rights and privileges there under.
2. The Board, under the authority of KRS 313.070 and 201 KAR 8:532, has decided that students, or dentists licensed outside the state or country learning in this setting may practice under the direct supervision, order, and control of Dr. Henry Hood without further requirement. Please send an email notice to the Board with the names and place of origin of each of these individuals and the approximate start and end date of their mini-residency.

The Kentucky Board of Dentistry wishes to extend to you their heartfelt thanks for the hard work you and your clinic does and we wish you the best as you continue to serve those in need.

Sincerely,

A handwritten signature in black ink, appearing to read "Brian K. Bishop".

Brian K. Bishop
Executive Director
Kentucky Board of Dentistry

LEE SPECIALTY CLINIC

Welcome to Kentucky's new home for compassionate, interdisciplinary care for patients with intellectual and developmental disabilities (IDD). Welcome to the **Lee Specialty Clinic**.

From the moment we opened our doors, we changed the world for persons with IDD. We reimagine what is possible and redefine the practice of healthcare for our patients. Our difference isn't just our commitment to better outcomes for our patients; it's our unique culture of caring for all who enter our doors.

Where Compassion Lives

Lee Specialty Clinic is proudly named after State Representative Jimmie Lee of Elizabethtown, a tireless advocate, and the leading legislative voice for Kentuckians with IDD. We continue his advocacy, as the groundbreaking provider of seamless medical, dental, psychiatric and therapeutic care.

We understand the special needs of persons with IDD and their families. Designed for patients age 16 and older, this isn't mainstream healthcare as usual. It's as exceptional as the patients we serve.

There's No Place Like Home

The Lee Specialty Clinic's collaborative education and research programs are unlike any teaching programs in the country. As an affiliate of multiple colleges and universities throughout the Commonwealth of Kentucky, we help to pioneer dynamic developmental medicine, developmental dentistry, therapeutic services and behavioral sciences teaching programs.

The World Is Our Neighborhood

Doctors and students from around the world train under our clinical mentors, experiencing first-hand the rewards that come from caring for our exceptional patients. Our vibrant, interdisciplinary research program focuses exclusively on identifying and resolving the myriad deficiencies in the healthcare services being provided to individuals with IDD.

As a recipient of multiple local and national research awards, our program has also produced scientific articles and book chapters published in the United States, Germany, Great Britain, Poland and Japan.

Caring for the Community

Our specialized Crisis Response Program coordinates access to a wealth of services throughout the community to persons with IDD who find themselves in crisis.

Our Advocates

"I have followed the evolution of the Lee Specialty Clinic for nearly a decade, and I've seen the results of the work done by the doctors who work there. They are truly international leaders in this field."

– Timothy Shriner, PhD, Chairman of the Board, Special Olympics International
"The Lee Clinic offers a rare combination of compassion and competence. Our families deserve respect and need world-class care. This is not just health care, it's a health care Home."

– Donovan Fornwalt, CEO, The Council on Developmental Disabilities, Inc.
"It takes a team to care for our special patients, and I'm proud to be a member of the Lee Specialty Clinic team."

– Laszlo Makk, MD, Affiliate Gastroenterologist

"This is a Dream Clinic come true!"

– Mimi Kramer, Mother of a Lee Specialty Clinic Patient
